# Computers++

A computer Science Re-Education Campaign

.Mission

// We revolutionize computer science education for an **inclusive future.** We're on a mission to **rewrite narratives, break stereotypes,** and foster **creativity in tech classrooms.**

Female Students
Secondary Students
Underrepresented Students

Creative Coders

After-school Clubs
CS Education
Female Computer Scientists
CS Organizations

// Solution Overview

.How?

Rewrite Narratives
Challenge stereotypes, making CS **accessible** and immensely **creative** for everyone.

Personal Connection
Recognizing the work of active female computer scientists and showing their process.

Sharing Opportunities
An active channel with regularly updated **opportunities for beginner coders.**

.Why?

// **Change the Field:**

The Gender Gap in tech and computer science education has been growing since the 1980's, it's time for a change.

Ratio of Computer Science Degrees

1980s	2010s	Goal
37:63	20:80	50:50

.Process

// **Get involved in reshaping CS education!**

<1>
Computer scientists film their work process using one of our video templates and share it with us.

<2>
We share it on **Computers++** to showcase female role models in CS. Revenue goes back to the author.

<3>
Female highschool students are inspired by the videos and decided to investigate further.

<4>
Students find our **channels** full of beginner opportunities and decide to give it a go.

Join Us To Make a Change

Let us do the heavy lifting — your role? Watch enrollment soar and diversity thrive.
